PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building fast, immersive web products with React.js, Next.js and TypeScript.

Currently leading frontend development at Elephant Skin for real estate platforms, including BEES, used by 11 clients: from 360° presentations that load without the wait to the proposal and lead tools brokers use to close sales. Results include reducing load times by up to 40% and increasing user engagement by up to 30%.

Experienced in performance optimization, SSR/SSG, state management, mentoring developers and working with cross-functional teams in agile environments.

EXPERIENCE

Elephant Skin — Frontend Engineer (Remote)

December 2023 – Present

Leading frontend development for real estate platforms, including BEES, used by 11 clients: interactive presentations for each development and the sales tools brokers use every day.

- Built a 360° presentation for a residential community with 764 homes (150 frames per home, 55–60 MB per spin) using priority preloading, background downloads in a Web Worker and an interface that stays usable while frames arrive, reducing load times by up to 40% and increasing engagement by up to 30%.
- Developed the proposal flow across the buyer-facing presentation and the broker CRM: payment plans, attachments up to 2 GB, deep links that open the buyer's own unit, and click tracking turned into a readable history for brokers.
- Created interactive masterplans with SVG hit-testing, canvas masks that identify units on 360° renders, dynamic galleries and zoomable maps with nearby points of interest.
- Wrote API contracts with the backend team and built responsive, permission-aware CRM screens for leads, brokers and proposals.
- Worked in Scrum with designers, backend developers and product managers, using Git and GitHub for code reviews and Claude Code to speed up debugging and refactoring.

Technologies: React.js, Next.js, TypeScript, JavaScript, Canvas, SVG, Web Workers, Google Maps API, Leaflet, Redux, React Query, Styled Components, Tailwind CSS, Vite, Webpack, Jest, React Testing Library, REST APIs, Git, GitHub, CI/CD, WCAG 2.1 AA, Claude Code, Cursor.

Luby — Frontend Developer (Remote)

October 2021 – November 2023

Developed modern and responsive user interfaces using React.js, Next.js, JavaScript, and TypeScript, enhancing user engagement and experience across multiple platforms.

- Resolved operational issues for employees and the company, optimizing internal processes and improving data organization, achieving up to a 30% reduction in process delays.

- Significantly improved application performance, reducing load times by up to 35% and delivering a faster, more efficient user experience.
- Provided active support and mentorship to junior frontend developers, strengthening their programming skills and understanding of web development best practices, contributing to increased team productivity.
- Contributed to backend development with Node.js, supporting full-stack demands when necessary.
- Collaborated within a multidisciplinary agile team (Scrum), working closely with Product Owners, designers, and developers to enable iterative deliveries and continuous improvement.

Technologies: React.js, Next.js, TypeScript, JavaScript, Redux, WebSockets, Material UI, HTML5, CSS3, REST APIs, GraphQL, Node.js, React Native, Vite, Webpack, Jest, React Testing Library, Git, GitHub, Scrum.

EDUCATION

Universidade Paulista (UNIP) — Bachelor's Degree in Computer Science
2020 – 2023

LANGUAGES

Portuguese: Native

English: Full professional proficiency

TECHNICAL SKILLS

Core Frontend: React.js | Next.js | TypeScript | JavaScript (ES6+) | HTML5 | CSS3

Architecture & Performance: SSR | SSG | ISR | Code Splitting | Lazy Loading | Web Workers | SEO | Accessibility (WCAG 2.1 AA)

Interactive Graphics & Maps: Canvas | SVG | Google Maps API | Leaflet

State & Data: Redux | Context API | Zustand | React Query | REST APIs | GraphQL | WebSockets | Firebase

Styling: Styled Components | Tailwind CSS | Material UI | CSS Modules

Testing & Tooling: Jest | React Testing Library | Vite | Webpack | ESLint | Git | GitHub | CI/CD

Backend: Node.js | MySQL

AI-Assisted Development: Claude Code | Cursor
